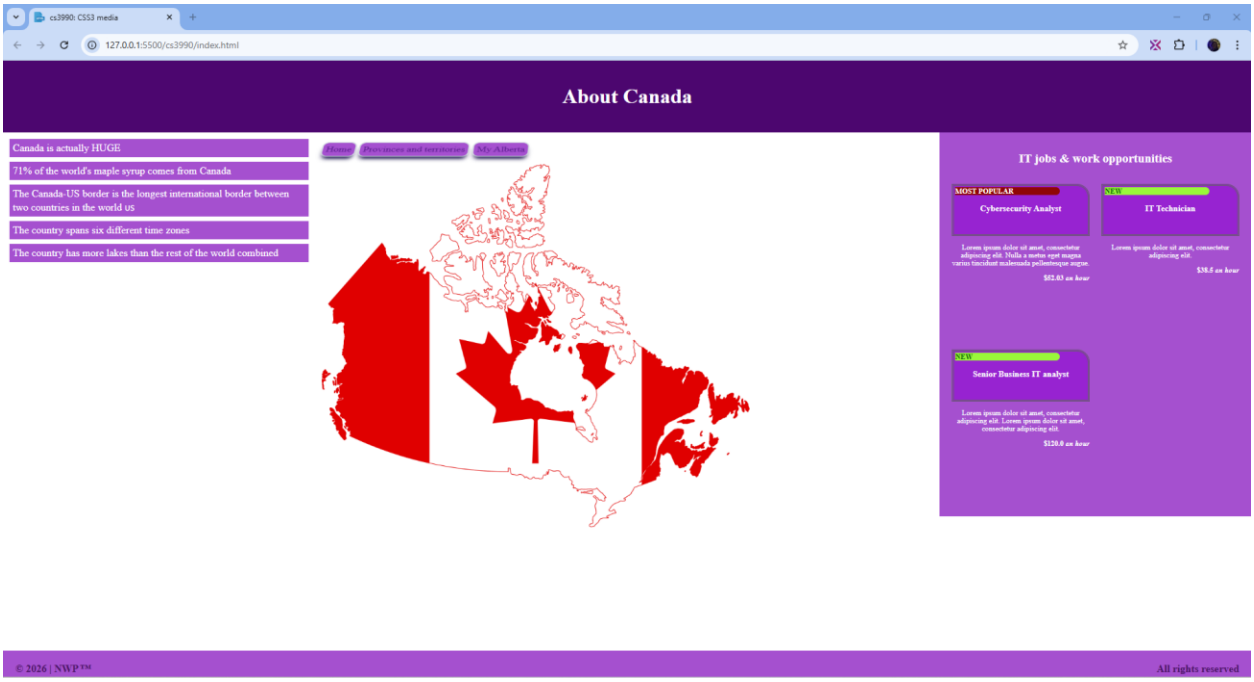
CS3990. Assignment 4 (25 points)

CSS advanced. Using media queries

Develop a landing page for the “About Canada” website **(!!!watch the video on A4 branch to find all required features and effects**)

The template of the whole web site:



The correct position and display of all elements of the web site including when scaling (for example when you rotate the device) - **10 points**

Task 1 (5 points)

A central part of the web site includes a horizontal tabbed menu (use appropriate combinations of transformation, transitions, and gradients to reach the specified appearance) and content below (see a general template below).

When a customer selects a tab (via an appropriate menu item) the corresponding panel with its content appears.

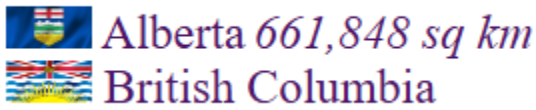
Initially (when no tabbed menu item is selected) the image (a map of Canada) is displayed instead of text content (see the 1st screenshot).

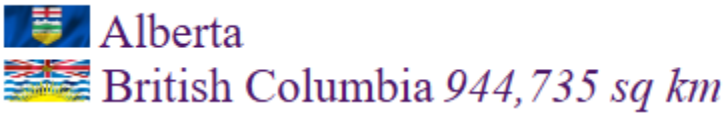
Note! when you hover over the tabbed menu items, the background color changes to a darker one (see the 2nd screenshot above), and transformation is applied.

Task 2 (2 points)

The 2nd tab includes a list of Provinces and territories with Canadian Provincial Flags as a markers

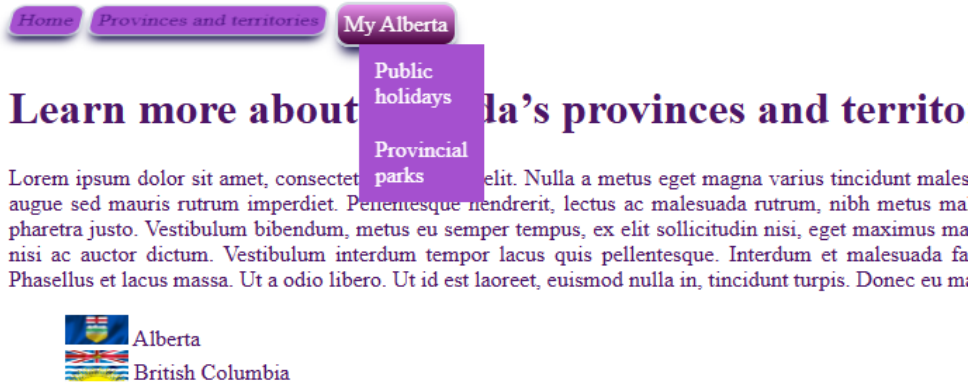
When a customer places the mouse cursor over the list item the content about this province area appears (formatted in *italics*) after its name:

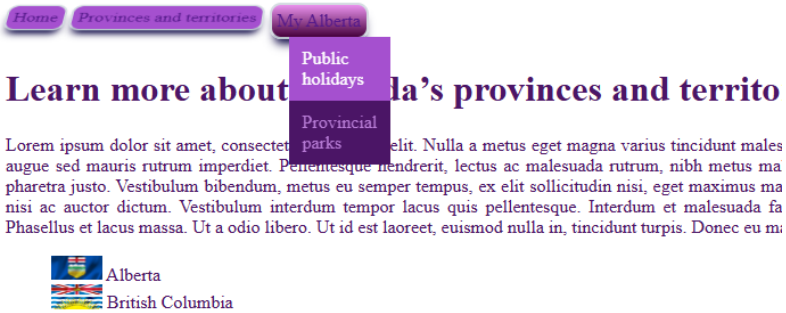




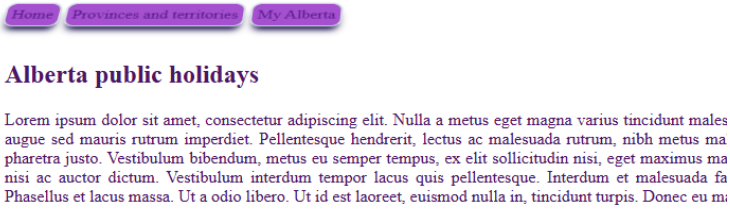
Task 3 (3 points)

When you hover over the 3rd menu item (My Alberta), a submenu appears as follows:





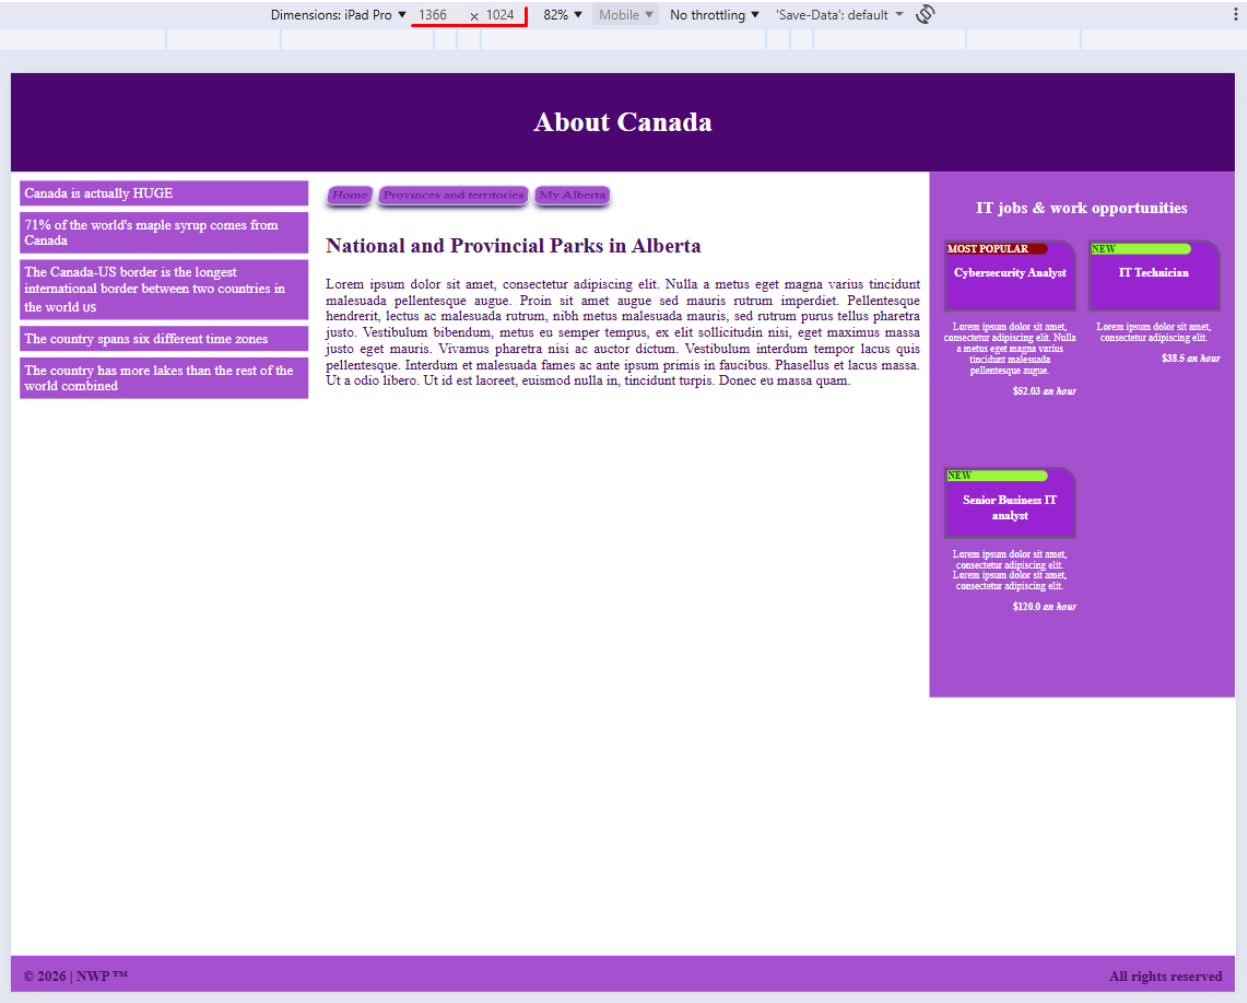
When a customer selects an item from a submenu the corresponding panel with its content appears (see an example below):



Task 4 (5 points)

The rightmost section of the web site contains information about IT Jobs and Work Opportunities in Alberta as following examples show:

A) The desktop version:



IT jobs & work opportunities
