CS3990. Assignment 2
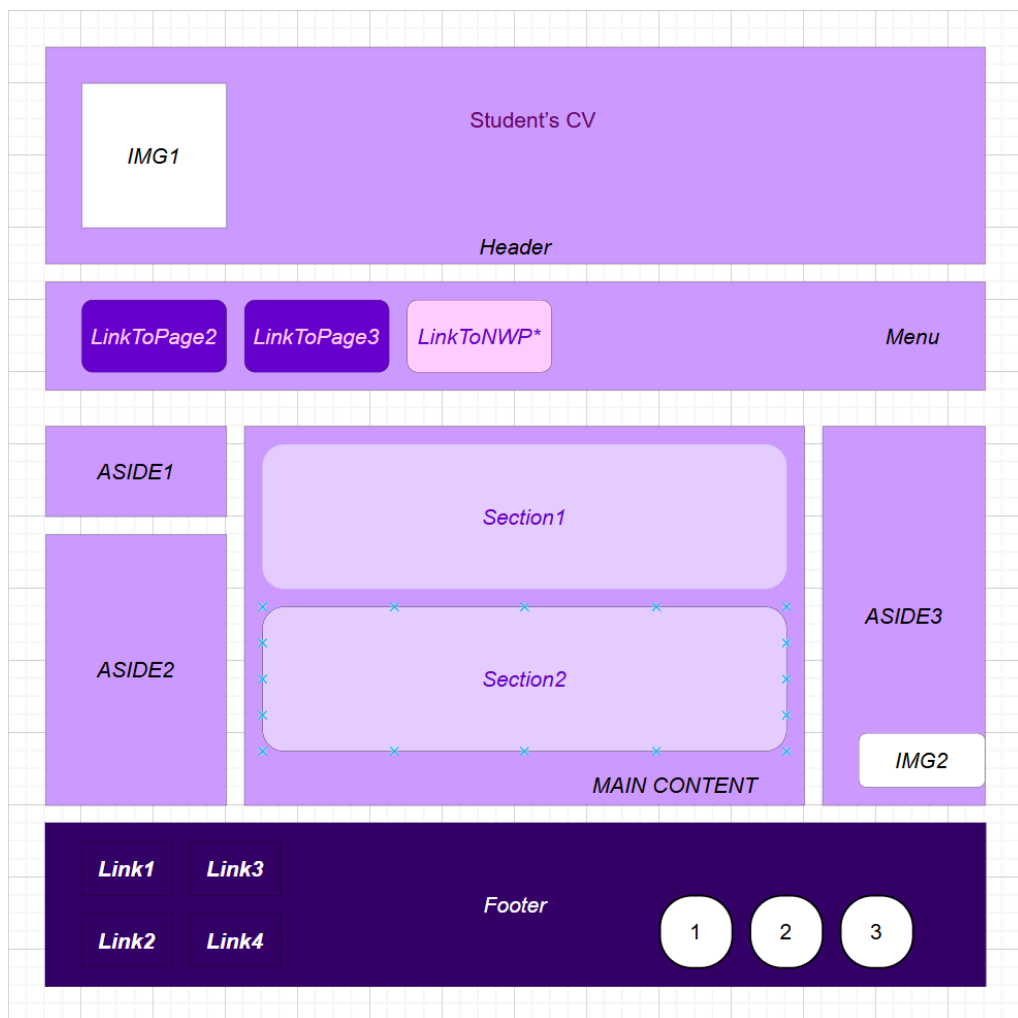

HTML and CSS fundamentals. Part 2

Your goal is to create the next version of your personal website "Student's CV" (as a landing page) with extra CSS3 formatting and a different layout.

In digital marketing, a landing page is a standalone web page, created specifically for a marketing or advertising campaign

Tasks description

Develop the landing page (*index.html*) **accordingly to the following sketch**:

The landing page consists of the following blocks (**use HTML5 semantic tags to create them and CSS positioning to place them strictly according to the template**):

The *Header* – includes
  ➢ the *Title* (Student's first name Student's last name CV), for example Hanna Yehoshyna CV
  ➢ the *IMG1* block which contains student's photo

The *Menu* – includes
  ➢ 3 links (look like rounded buttons):
    ✓ *CS in NWP* (https://www.nwpolytech.ca/departments/science/)
    ✓ *Faculty&Staff* (https://www.nwpolytech.ca/departments/science/faculty.html)
   ✓ *NWP Home* (https://www.nwpolytech.ca/)

Notes! When you hover over a link its color changes (from ⬛ to ⬛). "LinkToNWP" represents this case

The *Aside1* – includes:
 ➢ the NWP building photo

The *Aside2* – includes:
  ➢ the List of courses taken by student (according to the template and its description below)

- light background for the entire list;
- darker background for one list item;
- the darkest background only under the text.

Also, you need to add margins and padding to achieve the result above.

The *Aside* 3 – includes information about Student's Additional education (you can use a content from your Assignment 1 to fill it) organized as the To Do List (completed and planned items). Follow the template and notes below (<u>but with your own data</u>)

Notes:
- even and odd elements have a blue background with different shades.
- checked items have
  - ➢ a gray background,
  - ➢ a check mark icon (done.png),
  - ➢ and their text is crossed out.
- unchecked list items are displayed with an icon without a check mark (toDo.png).
- The red cross can be displayed using a special character (✘)

The *Main content* includes 2 blocks located one below the other:

Section 1: Personal Skills and Qualities (you can use a content from your Assignment 1 to fill this section)

Section 2: Education (you can use a content from your Assignment 1 to fill this section)
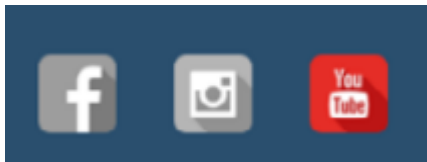

The F*ooter* consists of

> 2 columns with menu items (which repeat the links from menu with one extra link – to the student's GitHub repo for this course).
>> **Notes!** When you hover over a menu item, it should become underlined
> and 3 social network icons (see example below) (1, 2 and 3 items on the sketch)

Notes!

When you hover over social network icons, they should become colored (use CSS property *background-image* for this)

Important notes!!!

- ✓ **ASIDE1** – a **sticky** block (to the top)
- ✓ **IMG2** – one more photo of NWP building (works as a link to https://www.nwpolytech.ca/) implemented as a **fixed** block (rounded)
- ✓ **FOOTER** – a **fixed** block
